

RANUSHA RAMESH

 **+91 6385721472**

 **rameshranusha4@gmail.com**

 **Chennai, Tamil Nadu, India.**

Computer Science undergraduate with hands-on experience in Python, SQL, Data Analytics, Front-end Development and Machine Learning. Skilled in developing data-driven applications and systems through internships and industry projects. Passionate about Data Engineering, problem-solving, and transforming data into actionable insights.

STRENGTHS AND EXPERTISE

Data Analytics	Data Engineering Concepts	Problem Solving
SQL & Database Management	Machine Learning & AI	Analytical Thinking
Python Programming	Full-Stack Development(FLASK)	Leadership & Communication
		Team Collaboration & Adaptability

PROFESSIONAL EXPERIENCE

Zeocra Innovations Chennai Role - Web Dev Intern - Built responsive web applications using HTML, Tailwind CSS, Flask, and SQL, enabling seamless user interaction and data management. - Utilised AI-assisted development tools to enhance development efficiency, optimise workflows, and support feature implementation.	Apr 2026-May 2026
Arabian International Company Steel KSA Role - ML & Technology Intern - Analysed industrial sensor data (temperature, vibration, and pressure) and developed machine learning models for predictive maintenance, equipment failure forecasting, and operational monitoring. - Applied computer vision techniques to automate quality inspection by detecting welding defects, cracks, and corrosion in steel tank surfaces.	Dec 2025 - Mar 2026
Meras Plugins Pvt Ltd IITM Research Park, Chennai Role - AI ML Intern - Worked extensively with PostgreSQL databases, designing queries and aggregation workflows for processing and analysing time-series business data. - Researched and evaluated forecasting and anomaly detection models to identify suitable approaches for predictive analytics and operational monitoring.	Jul 2025 - Oct 2025
MIT SQUARE Malaysia Role -TL & AI Solutions Architect - Led the development of PathGuide, an AI-powered traffic management system using YOLOv11 for real-time vehicle detection and traffic analysis. - Designed and coordinated solution architecture, model integration, and deployment workflows.	Oct 2024-Oct 2025

TECH IMPLEMENTATIONS

Stroke Revival Rehabilitation (Strivo) Tech Stack: Python, EMG Sensors, AI Agents, ReactJS, LLMs - Built an EMG-based stroke rehabilitation platform that transforms raw muscle signals into actionable recovery metrics for objective progress tracking and early recovery detection. - Developed data processing, monitoring, and visualisation workflows to generate clinical insights and support continuous rehabilitation in both clinical and remote settings.	Apr 2026-Present
EMG Signal-Driven Control System (NeuroAssist) Tech Stack: Python, EMG Sensors, IoT, Database - Developed a wearable EMG-based system that allows amputees to control computers and digital interfaces using muscle movements instead of traditional input devices. - Real-time gesture recognition system using sensor data for accessible digital interaction.	Jul 2025 - Mar 2026

Smart Traffic Management System (PathGuide)

Oct 2024 - Jan 2025

Tech Stack: Python (YOLOv11), OpenCV, Flask, MySQL, IoT

- Developed PathGuide, a traffic monitoring system that uses computer vision to detect and track vehicles in real time.
- Integrated IoT devices, databases, and a web platform for traffic monitoring and data analysis.

Log Summariser

Sep 2025

Tech Stack: Python, Regular Expressions (Regex)

- Developed a Python-based log summarization tool using regular expressions to classify system logs and highlight important events.
- Improved troubleshooting efficiency by reducing the time required to review and analyze large log files.

CERTIFICATIONS

- Machine Learning Specialization – DeepLearning.AI (2026)
- Unsupervised Learning, Recommenders & Reinforcement Learning – DeepLearning.AI (2026)
- Introduction to Machine Learning – NPTEL IIT Kharagpur (2025)
- SQL Intermediate – HackerRank (2024)
- Python Data Analyst – Infosys Springboard (2024)

LEADERSHIP & POSITIONS OF RESPONSIBILITY

- Team Lead, Epic Community
- Vice President, Computer Science Club
- Technical Team Lead, Catalyst Club
- Project Team Lead – Multiple Software Development Projects
- State Committee Co-ordinator, Youth United Council
- Mentor, Buddy System – Guided and supported peer students and juniors through technical learning sessions and academic mentoring.

ACHIEVEMENTS & RECOGNITION

- Finalist, Smart India Hackathon (SIH).
- Published a research paper and secured a copyright for PathGuide, a smart traffic monitoring and management system.
- Selected for the International Student Abroad & Research Exposure Program at University of Cyberjaya, Malaysia.
- Finalist, HackWithIndia.
- Top 13% Candidate, Algo University ATF 2024.

EDUCATION

Sathyabama Institute Of Science And Technology

2023- Present

BE CSE WITH AI

CGPA: 8.89 till VIth Semester

St.Alphonsa Matric Higher Sec School

2016-2023

Computer Science & Mathematics

HSE: 89%

Technical Skills: Python, SQL, Java, MySQL, PostgreSQL, MongoDB, Flask, TensorFlow, OpenCV, Streamlit, HTML, Tailwind CSS, Machine Learning, Deep Learning, Neural Networks, Data Analytics, Data Engineering, Computer Vision, ETL, IoT, C, C++.
